

3. Elementary Analytical Methods

MILTON ABRAMOWITZ ¹

Contents

	Page
Elementary Analytical Methods	10
3.1. Binomial Theorem and Binomial Coefficients; Arithmetic and Geometric Progressions; Arithmetic, Geometric, Harmonic and Generalized Means	10
3.2. Inequalities	10
3.3. Rules for Differentiation and Integration	11
3.4. Limits, Maxima and Minima	13
3.5. Absolute and Relative Errors	14
3.6. Infinite Series	14
3.7. Complex Numbers and Functions	16
3.8. Algebraic Equations	17
3.9. Successive Approximation Methods	18
3.10. Theorems on Continued Fractions	19
Numerical Methods	19
3.11. Use and Extension of the Tables	19
3.12. Computing Techniques	19
References	23
Table 3.1. Powers and Roots	24
n^k , $k=1(1)10$, 24, 1/2, 1/3, 1/4, 1/5 $n=2(1)999$, Exact or 10S	

The author acknowledges the assistance of Peter J. O'Hara and Kermit C. Nelson in the preparation and checking of the table of powers and roots.
